

# Report 1 : Inception

Luca Deltodesco, Matthias Hueser,  
Andras Slemmer, Cliff Sun, Luke Tomlin

October 13, 2011

## 1 Key Requirements

*"Up to 10 most critical or high-risk, but definitely essential, requirements that your completed system will meet; their realisation should secure at least grade B. "*

## 2 Extensions

*"Additional features or requirements that, if implemented satisfactorily, could contribute to the group getting an A (provided the group scores well on all other criteria). "*

## 3 Choice of Development Method

*"Suggested (blend of) agile software development method you intend to use. A description of the anticipated methods and practices for code testing and version control. Identification of needed information technology.*

*Your project management: how you measure project progress or velocity, what roles and responsibilities team members have throughout project, how often and in what form (e.g. Scrum meeting) will you meet, etc. "*

## 4 Draft Schedule

*"A well-considered but non-binding estimate of how the project should progress:*

*Outline of anticipated number of time-boxed iterations you will use*

*Tentative list of features or milestones that each iteration should deliver in executable software*

*For each feature, an analysis of the technical components necessary for their realization.*

*Identify which components are supposed to work for each iteration."*

## **5 Detailed Plan for First Iteration**

*"Specification of length of, and dates for, your first time-boxed iteration of software development.*

*Detailed mapping of tasks for the iteration, wg with a Sprint backlog.*

*Identification of potential risks during first iteration.*

*Planned progress measure for first iteration. "*
